

The UV Chambers family is expanding!

Discover the new UV CHAMBER HG

The UV CHAMBER HG is an oven designed for curing applications. It is equipped with a high-powered SubZero mercury UV lamp developed by IST INTECH.

With its safety system, the UV CHAMBER HG protects against ultraviolet irradiation during use

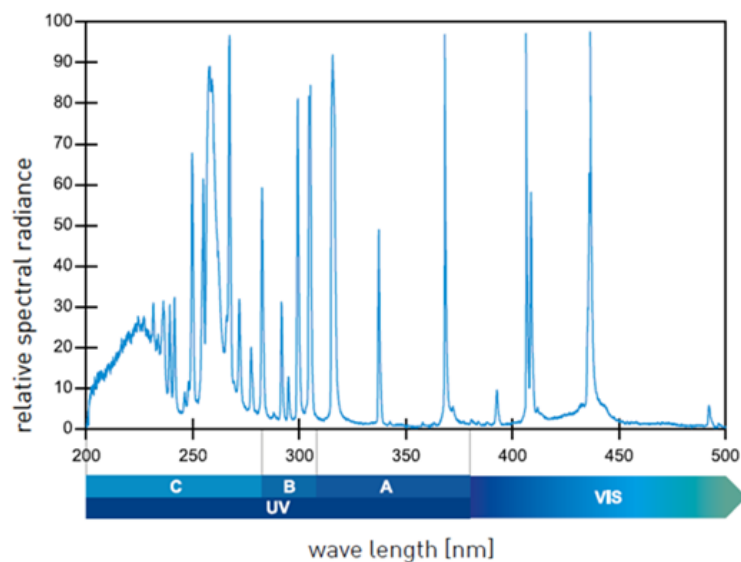

UV lamp SubZero

This new UV chamber configuration uses SubZero lighting system designed by IST INTECH.

This UV mercury lamp offers several technological advantages compared to standard UWAVE LED system such as:

- Output power up to 100 W/cm
- High-intensity reflectors
- Quick cassette change
- Full UV range (UVC, UVB, UVA and VIS) emission spectra

Chamber unit

This is a compact enclosure designed to hold the UV lighting module, allowing for optimal use of the lamp. The whole system is integrated into a chamber that features:

- Easy to use and intuitive Plug & Play system
- Selection of cycle duration thanks to the timer
- Hours counter for the UV lamp lifetime
- Secure system for effective and intelligent UV protection

Power supply and control system

The external power supply ensures a right operation of the lamp, while the advanced remote control enables:

- Control of system startup
- Management of intensity level
- Indication of lamp status
